

Zoom | First Time Set Up

To get the best experience out of a virtual lesson you should follow these steps before the start of the lesson. We recommend using a laptop as the below settings do not apply to tablets and phones, meaning the audio quality won't be as good:

1) Download Zoom for free
<https://zoom.us/download>
Open the programme and click "New Meeting"

2) Click on the up arrow next to the 'Mute' button, then click on 'Audio Settings'
